Web Development Projects

Digital Cinema Collective, Official business website for Digital Cinema Collective **Jun 2024 - July 2024**

- Redesigned and migrated a client's website from Wix to Webflow, creating a more customized, responsive, and visually appealing site while improving performance and functionality
- Compressed video file size by 89% and deployed video via Google Cloud Storage to improve loading times, reduce bandwidth usage, and minimize storage costs without sacrificing quality
- Configured client's DNS records to update and transfer domain connectivity from Wix to Webflow
- Deployed client's news/blog section via Webflow CMS and added Instagram widget

Funicular Goats, Official projects and services website for Funicular Goats **Jan 2024 - Mar 2024**

- Reviewed and refactored existing website, eliminating redundancies and improving readability to enhance maintainability and overall performance
- Resolved CSS glitches, ensuring consistent styling across pages and improving site responsiveness
- Redesigned and refactored pages and page components for efficiency and user-friendliness
- Utilized Webflow CMS page for client's news/blog section and added Instagram widget

Power Mate USA, Official website and product catalog for Power Mate Technology **Sep 2022 - Mar 2023**

- Created static React/GatsbyJS website for Power Mate Technology, Inc.'s business and products
- Hosted 500+ product documents and files in AWS S3 storage bucket
- Generated 190+ product pages using AWS DynamoDB and GraphQL data querying

Staffer, Create production staffing documents with ease **Aug 2022 - Sep 2022**

- Created a ReactJS app that can create a staff list PDF document for film and TV production
- Utilized file upload for images and CSV file parsing
- Deployed frontend through Netlify via GitHub repository integration

Clarity, A skin-care product ingredient lookup **Feb 2021 - Apr 2021**

- Implemented simple ReactJS search bar to quickly check for skin irritating ingredients in one copy paste
- Webscraped 1,800+ unique data entries from paulaschoice.com using NodeJS and Cheerio
- Populated Mongo database using MongoDB CloudAtlas for monitoring and manipulating

Work Experience

Freelance Web Developer, Self-Employed **Feb 2021 - Present**

- Delivered custom web development projects within agreed timelines and budgets, with a focus on user-centered design and functionality
- Collaborated with business owners to translate requirements into functional and visually appealing websites
- Provided ongoing support and website maintenance, improving site performance and troubleshooting issues for long-term client satisfaction
- Improved site load times by 30% by leveraging web performance best practices such as asset compression and code optimization

Can't Cancel Pride 2022, Video Production Assistant **June 2022**

- Scouted video event relevant clips from YouTube, TikTok, and Instagram for 5 minute video
- Searched for B-roll and stock video from gettyimages
- Maintained video data spreadsheet for rights owners, source url, clip length, and timestamps used

Coach Summer Signature 2022, Photo Shoot Production Assistant **Feb 2022**

- Unpacked and repackaged product samples in preparation for photoshoot and transport
- Assisted prop stylists in constructing and painting photoshoot props
- Erected and swapped out seamless backdrops and C-stands

NFL Super Bowl LVI Halftime Show, Broadcast Production Assistant

Jan 2022 - Feb 2022

- Managed and tracked database of 4500+ meal tickets for lunch orders at catering for crew of 800+
- Directed and escorted 500+ half-time field team volunteers to and from stadium
- Distributed and organized performance equipment for dance crew of 100+
